HOW TO IDENTIFY GENUINE RUDRAKSHA

- It is important to identify genuine RUDRAKSHA and differentiate it from the fake ones. Only natural genuine RUDRAKSHA can provide us with spiritual benefits. Here are a few parameters that can help identify the real RUDRAKSHA from the fake ones:

Notes

1. Surface Texture, Shape & Weight

- Have natural grooves and mukhi lines that are well-defined & continuous, running from top to bottom of the bead.
- Rough thorny texture with a round or oval hard woody surface.
- Lightweight but dense and solid at the same time; will not be hollow or unnecessarily heavy.

Notes

2.Colour, Luster & Hole

- Light brown to dark brown in colour.
- Should not be too shiny or polished as that indicates artificiality.
- Overly polished RUDRAKSHA should be avoided.
- Should have a hole that goes through the center & should not be artificially enlarged.

Notes

FAKE RUDRAKSHA

- Beware of the RUDRAKSHA made from wood, plastic or synthetic materials.
- RUDRAKSHA beads made from ordinary wood and carved to resemble the genuine ones lack the natural grooves and texture of real RUDRAKSHA.
- Plastic or resin beads are mass-produced and painted to mimic the appearance of RUDRAKSHA are usually too smooth, lightweight, and have an unnatural sheen.
- Genuine RUDRAKSHA beads are also altered in order to give them the extra lines and this becomes difficult to identify it without close inspection.

TIPS TO AVOID FAKE RUDRAKSHA

- Buy only from a trusted and certified source.
- Check if the authenticity of RUDRAKSHA has been certified by recognised authorities or laboratories.
- If the beads look too uniform or perfect, then its best to inspect them properly.
- Consult with an expert to help identify genuine RUDRAKSHA.

Notes

TESTS TO IDENTIFY RUDRAKSHA BEADS

- **Water Test** - Put the RUDRAKSHA bead in a glass of water; genuine RUDRAKSHA beads will sink to the bottom but the fake ones may float.
- **Copper Coin Test** - Rub the RUDRAKSHA bead with a copper coin. If the bead leaves a black mark on the coin, it is genuine.
- **Milk Test** - Soak RUDRAKSHA bead in a glass of milk and leave it for 24 hours; genuine beads will not affect the milk's colour but the fake ones will cause discolouration of milk.

Notes

TESTS TO IDENTIFY RUDRAKSHA BEADS

- **X-Ray Test** - Take an X-Ray of RUDRAKSHA bead which will help reveal the internal structure of the RUDRAKSHA; check for natural formation of mukhi lines and seed's internal configuration.
-
- **Electromagnetic Test** - Genuine beads will respond to electromagnetic activity.
- **Boiling Test** - Boil the RUDRAKSHA in water for 10-15 minutes. If its a real bead, its structure and colour will remain intact while fake beads will lose colour or crack.
- **Hole Drilling** - Hole should be naturally formed and pass from one end of the bead to the other. If hole appears artificially drilled, its a fake bead.

Notes

TESTS TO IDENTIFY RUDRAKSHA BEADS

- **Magnifying Glass Check** - Use a magnifying glass to closely examine the surface; any signs of tampering, artificial carvings, uniformity in mukhi lines, plastic like material etc.
- **Smell test** - Burn a small part of the bead and check the kind of smell it emits - natural woody or plastic like.

Notes

3. Soul Urge Number
